ASCILITE Web Poster

Dr. Dorit Maor

Science & Mathematics Education Centre,
Curtin University of Technology
AIMS OF USING THE WEB

- To create community of teachers-learners in which the common goal is learning with computers.

- To provide on-line teaching and learning experiences.

- To improve technological skills of teachers.

- To overcome the intellectual isolation of teachers.
THE CHALLENGE

- To involve teachers in computer networked communication in order for them to become familiar with the technology and utilise it for their own communicative learning.
PARTICIPANTS

- Science and mathematics teachers from around Australia, who enrolled in Computer Education Unit as part of their postgraduate program in Science and mathematics Education Centre, Perth, WA.
RESEARCH GOALS

- To investigate the opportunities that learning via the Web provides for distance education students in particular science and mathematics teachers.

- Evaluation of the unit was conducted formatively during the semester in the Activity Room discussion, and summatively via a questionnaire at the end of the semester.
