

## BOOK LAUNCH IN BUSH COURT

Perth City Council finance officer Bob Sainsbury, of Bullcreek, tends to hide his light under a bush (almost certainly a native Australian flora specimen).

This modest, amateur—but very knowledgable—botanist recently had his second field guide on W.A. wildflowers launched in Murdoch's Bush Court. The latest book, *A Field Guide to Isopogons and Petrophiles*, was officially launched by Professor John Considine, Professor of Horticulture.

The book, published by U.W.A. Press, is lavishly illustrated with colour photographs of these diverse and beautiful members of the Proteaceae family.
